

SK 600 T

MES MACHINE TERMINAL for factory and machine data collection

Compact data terminal for single machines and groups up to 16 machines

- 10,4" Colour-Touch-Screen
- very simple, intuitive operation
- direct input for binary count pulses
- integrated RFID chip reader

MES functions:

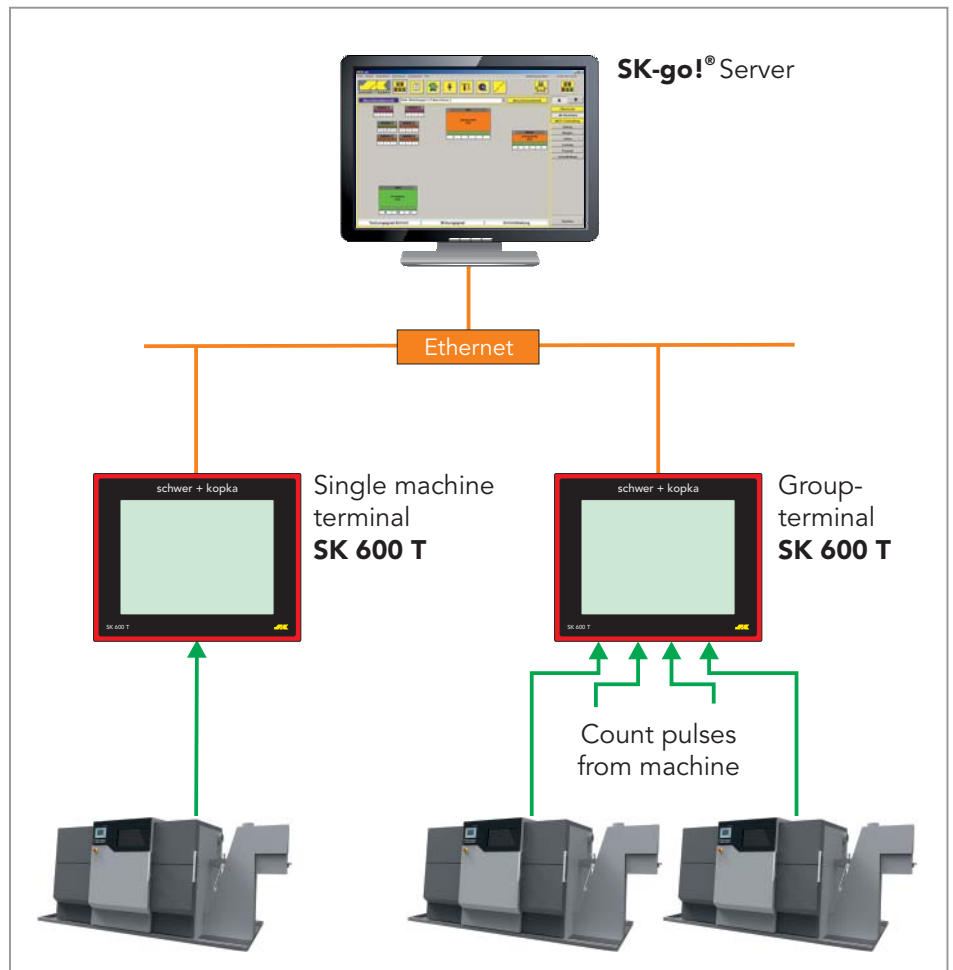

- start and terminate jobs
- report down codes and rejects
- report personnel to/from machine
- report batch changes
- report used tools
- view PDF documents

System layout

Terminals are available for single machines and for groups. The terminals are networked via the integrated Ethernet ports or as an option wireless through an integrated W-LAN module.

The terminals can be equipped with an integrated count module which allows to connect up to 4 machines directly to the terminal.

For applications with more than 4 machines per group terminal, we are using the SK-IK count adaptors for 8, 16, 24 or 32 machines.

Technical Data:

- 10,4" Colour-Touch-Screen
- fanless PC with Windows 10 IoT and SSD card
- power supply 24VDC
- optional count module with
 - 8 inputs for count pulses, etc.
 - 4 outputs to lock machine, connect a warning lamp, etc.
- data interfaces/ports:
 - 2 x Ethernet (1 optional)
 - 2 x serial (1 for bar code)
 - 2 x USB
 - optional W-Lan
 - optional RFID chip reader
- Weight 5,4 kg
- mounting yoke included
- optional mounting accessories (floor pedestal, swivel arm, kit for panel mount)

Please note that some features listed above are optional even if not specifically mentioned. Technical modifications are possible without prior notice.
